

COMMUNITY RENEWAL TEAM, INC.

CONNECTICUT WEATHERIZATION ASSISTANCE PROGRAM **RFP #WXDOE-WAP PY 2023, 2024 & 2025**

The following questions were received the week of 3/11/2024 regarding the WAP RFP.

1. What is this Certificate of professional Liability insurance? Is this different from the normal General Liability we normally carry, and or an addition too?

For contractors conducting environmental testing Professional Liability Coverage is required.

2. On the WAP Pricing Sheet. Looking at the measures- most of the boxes have NA in the labor & materials spots along with the total cost for that measure. Should I assume that all of the boxes that have NA already typed in that I should not be pricing these measures out on the form?

For measures that have NA in the Labor/Hour & Materials Columns you would be entering amounts in the Units Column.

3. RFP question on page 19 the "Required Forms" number 4 from the list "Copies of contractor registration form(s) submitted via <https://www.elicense.ct.gov/>" does this mean you want print outs of licenses? What exactly is it that is supposed to be submitted?

The Contactor Registration Form from the [elicense.ct.gov](https://www.elicense.ct.gov/) website populated with the information regarding your company must be submitted along with copies of licenses and certifications as outlined in the RFP. If you are unable to download the form from the site, we have included a copy for you to complete and return with your proposal. (See Document Contractors Registration Form)

4. The pricing sheet it is formatted where when we print doesn't fit on page, it is way too small, and cuts much off.

If printing out the pricing sheet it is formatted for legal paper – but remember it must be submitted electronically as outlined in the RFP Page 3, By Mail or Hand Deliver.

5. I have read the instructions on pricing a few times now. It is my understanding that if we do not fall in the 5% of median pricing for a specific item that we cannot do that work even if awarded bid. Is this how it is meant to be?

No. For any contractor that proposed a price up to 5% higher than the identified median price, it will be at that Contractor's discretion to decide if they will accept a contract for the lower median price – for that item.

6. There are some measures where it does not give a unit, are we supposed to provide our own for pricing?

Input from Vendors regarding the Pricing Sheet are being reviewed and the Pricing Sheet will be updated to reflect a description of pricing in the Units column. An updated Pricing Sheet will be posted early next week.

Questions will be accepted until Wednesday, March 20, 2024, at 4:30PM, and responses will be posted on Monday, March 25, 2024 by 4:00PM.
